

Main Logic (processFreq) state machine diagram:

current frequency : q
expected frequency : a
error allowance rate : ϵ
error range : $[2^{-\frac{\epsilon}{12}} a, 2^{\frac{\epsilon}{12}} a]$
least stable time : Δt
detect sound threshold : f_0

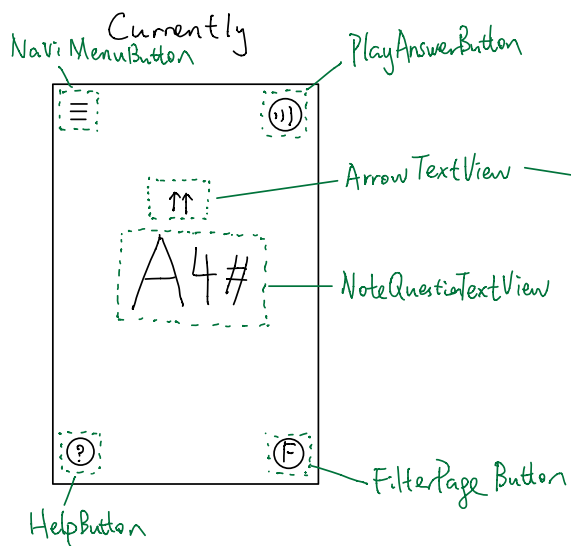

error warning factor : C

second error range : $C \times \text{error range}$

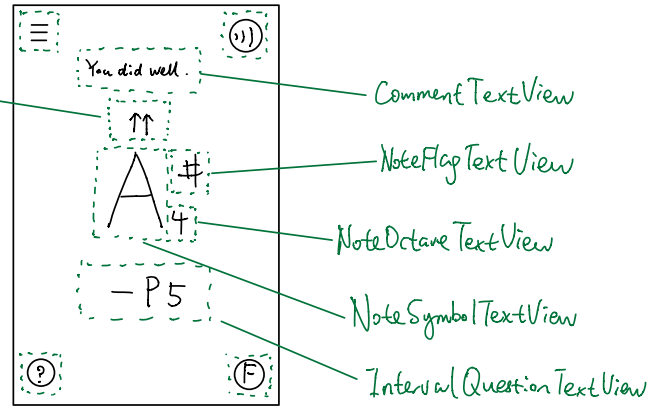

TOPO

General Main Screen

Ideally

Navi Menu

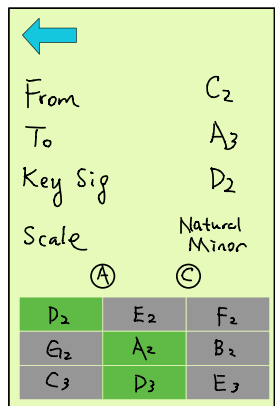

Summary

Note Practice Mode

Note Practice Filter Page

↙ can be more intuitive design
 (A): select/unselect all
 e.g. toggle to select all
 toggle again to unselect all

(C): select complement
 e.g. $U = \{1, 2, 3, 4, 5\}$

selected $\rightarrow S = \{3, 5\}$

toggle $\Rightarrow S \leftarrow U \setminus S$

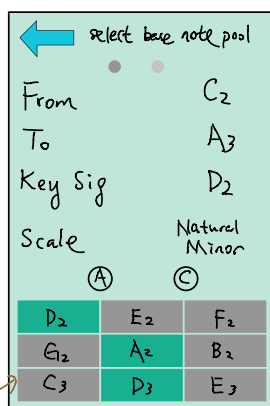

toggle again $\Rightarrow S \leftarrow U \setminus S$

Interval Practice Mode

- ①)
- single tap:
play D₄
 - long press:
play A₄

Interval Practice Filter Page

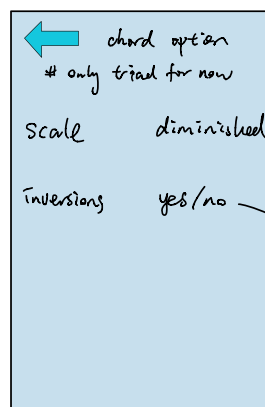

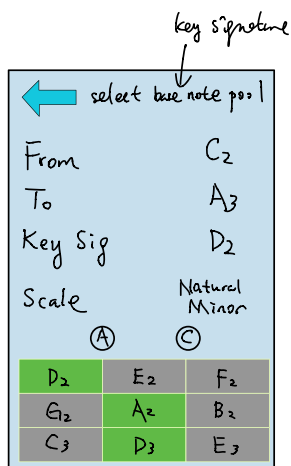

note pool generated by the filters
(candidate notes) above

Chord Practice Mode

- single tap:
play chord
- long press:
play notes
in order

Chord Practice Filter Page

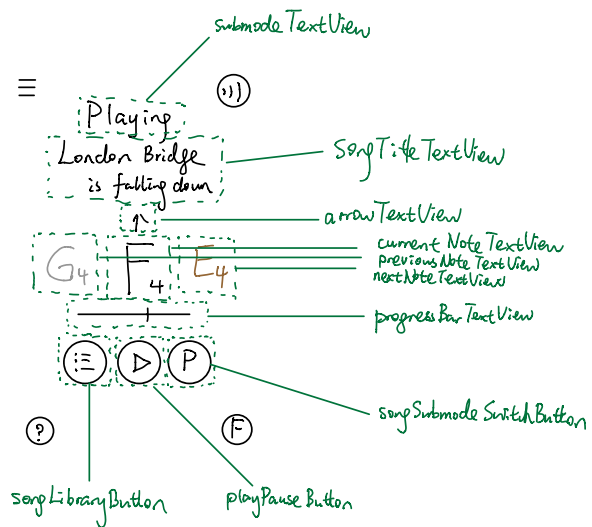

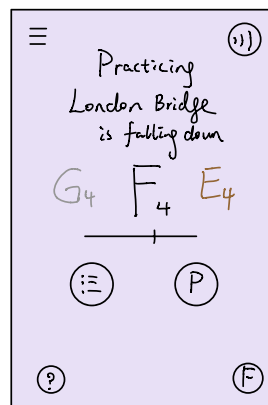

only support triad for now

major e.g. C E G
minor e.g. C E^b G
diminished e.g. C E^b G^b
augmented e.g. C E G[#]

e.g. G₂ C₃ E₃
E₂ G₂ C₃

in this case
key signature pool will be
{ D₂, A₂, D₃ }

Song Practice Mode

Setting Page

toggle

- auto play back
answer when
correct
- debugging mode
(show current pitch...)

hardcore

error allowance rate : ϵ
error warning factor : C
least stable time : st
detect sound threshold : f_0
